

### **Got a broken Batten Tension Bungee?**

Bungee's always run the risk of pulling off or loosing tension so the sail has been designed so the bungee's can be replaced.

Either fit a blokart Performance Batten Adjuster or use this remedy:

- Remove the old bungee
- Apply some tape to the end of a piece of 3mm bungee to create a point.
- Thread the bungee through a side loop of the Performance Batten cord. Note: the loops were designed for this purpose
- Thread through the other loop.
- Make a loop with the bungee approx 40mm diameter, tie a knot and cut off the excess.

**A great trick for fine-tuning batten tension**
